HD Radio Task Force
Station Check-List

Station Name/Frequency/Group: WXXX

Market: New York

Station Technical Contact: XXXX

Contact Number/e-mail: XXX/CCCC

Address for equipment delivery: XXXXX

Date:

11/22/33

	Item	Description	Comment
1	Importer version	For AE: Importer version 4.3.1P1 or later. Importer must be configured correctly with AE data client vendor	
2	Exporter version	For AE: Exporter version 4.3.2 or later	
3	Image Support Client	Image support client based on LOT SDK v4.3.3	
4	Automation software	For AE: Automation software must incorporate HD Radio HDP PSD SDK v4.7 or later For Tagging: must incorporate HD Radio HDP PSD SDK v2.0 or later	
5	Image license	Determine rights for image use (Gracenote/ Rovi) and buy or build a system for synchronization of images with audio playout	
6	Power Increase	Assess and implement power increase with current equipment. Plan for investments in new equipment to achieve maximum HD power increase. HD power increases help establish record with FCC on how much power increased	
7	PSD check	Review how the PSD is interpreted by the PSD software from the automation system for main fields required; Artist, Song, Title, Genre	
8	Music Tagging	Version of 3rd party software used for tagging that supports UFID (TagStation, Jump2Go, etc.)	
9	Multicasting	PPM encoding for HD multicast stations	
10	Monitoring	HD Radio Broadcast Monitor at station for uptime, signal levels and time alignment Alarms for multicast channels with e-mail notification	

11	Bandwidth configuration	Configuration of bandwidth for MPS/SPS services and data services. Consider all commitments to bandwidth for the specific frequency and model the allocations accordingly	
12	Internet and IP connectivity	Business class Internet and stable TCPIP infrastructure to the relevant devices in the HD Radio chain
